BODY DOG 'REX' JOINS MEG HUNT

IRELAND'S only human remains detection dog has been put into action for the first time in the search for missing Margaret 'Meg' Walsh.

Rex K9 was brought in by the Civil Defence to join the search in Waterford.

"If there is a dead body to be found, Rex will find it," his handler Marcel Steenkist told *The Star*.

Meg's daughter Sasha Keating (17) and her brother James Walsh (40) are due to make a public appeal later today.
